The Gardens

Power Available:

Attached are pictures showing what power is available at the large pavilion in The Gardens.

- The quad box that houses [2] 120V duplex receptacles are on one circuit.
- The 60A 208V receptacle is available to plug a temporary panel for additional circuits (which we have in the Electric Shop).
- The 20A 208V receptacle located at the bottom of the panels is on a circuit to itself.
- The electrical panel has an EL2 padlock.
- The black metal box that has the cords rolled up has a UT2 padlock.
